

Elmhurst College West Hall Residence

Elmhurst, Illinois

LEED™ GOLD

The Hill Group installed the HVAC systems for the new three story 75,000 square foot “West Hall”.

The facility is served thru a new mechanical tunnel providing steam and chilled water from the campus distribution system, Heat exchangers and pumps for the heating hot water system are in the basement. An air handling unit in the basement serves lower common areas while air handlers in the penthouse utilizing heat reclaim coils provide comfort and ventilation for the upper common areas. Each dorm room has a two pipe fan coil unit. A DDC temperature control system was installed.
